Supplementary Figure S1 — transcript, protein and pathway together

a Transcript bin to protein bin to pathway (top 10 of 29)

b MapMan membership: reconstruction vs PaintOmics

9 of 13 agree to within three features; the 4 that do not are the largest maps, and the reason is not recoverable from PaintOmics' published sources

Ribbon width is a locus count. Columns 1 and 2 conserve loci exactly; column 3 counts memberships. Three whole-ontology MapMan maps are excluded (each covers more than 25% of measured loci). Blue square = KEGG, green = MapMan, as in Fig. 6a.
